

Bambang Gunawan Tanjung

DevOps & Cloud Operations Engineer | Samsung SmartThings Ecosystem | AWS Infrastructure at Scale

📍 Jakarta, DKI Jakarta, Indonesia ✉ bambanggunawan887@gmail.com 🌐 www.bambanggunawan.id

🌐 bambanggunawanid

Summary

Cloud Operations & DevOps Engineer powering infrastructure within the Samsung SmartThings IoT ecosystem on AWS — delivering Content Management Systems serving 200M+ weekly requests via CloudFront across 6 enterprise projects. Architected zero-downtime deployments (canary + blue/green on ECS/ALB), drove 40% security posture improvement, and cut operational costs by 15%. Dual-track operator: leading cloud operations at Samsung R&D Institute Indonesia while serving as Developer Lead at Wolftagon, simultaneously owning infrastructure and product delivery.

Experience

DevOps Engineer & Cloud Operations, Samsung R&D Institute Indonesia – Jakarta, Indonesia Mar 2023 – present

Skills: AWS (EC2, ECS, EKS, CloudFront, S3, RDS, Lambda, CloudFormation, CodeBuild), DevOps, Linux, Docker, Kubernetes, CI/CD, Security Compliance Frameworks, Go

- Own and optimize AWS cloud infrastructure across 6 SRIN production environments (multi-AZ, multi-cluster, 200M+ weekly requests via CloudFront) — sustaining 99.9% uptime and driving 20-40% operational cost reduction
- Drive deployments and critical hotfixes for Samsung SmartThings CMS and Content Portal Admin — 100% deployment success rate across global rollouts
- Architected canary and blue/green deployment pipelines for SmartThings CMS on ECS/ALB — reduced deployment downtime to zero-detectable
- Hardened security posture by resolving 250+ vulnerability fail points — lifted Samsung Security portal score by 40%
- Designed AWS security group architecture for 3 projects per Samsung best practices — achieved 35% security posture uplift per project audit
- Architected high-availability infrastructure for 2 enterprise projects (multi-AZ ECS clusters, auto-scaling groups) — optimized performance and horizontal scalability
- Established daily AWS/VM/DB security audit checklists — sustained 100% compliance with Samsung Security Standards across all environments
- Initiated bi-weekly DevSecOps and AWS best-practice workshops — contributed to 25% team velocity improvement
- Owned delivery of 3 critical SRIN products (Salaam App, S-Lime App, E-Smart) — achieved 99.99% service availability, exceeding the 99.9% baseline across all 6 SRIN projects

Full Stack Engineer & Developer Lead (Concurrent), Wolftagon – Indonesia Feb 2023 – present

Skills: Golang, React (Typescript), CI/CD, AWS, Lead and mentorship

- Lead development of the Kolektibles App as Developer Lead — full-stack delivery in Golang and React Vite
- Architected AWS cloud infrastructure and GitHub Actions CI/CD pipelines for Kolektibles — from zero to production deployment
- Engineered 80+ REST API endpoints for Kolektibles (Golang) and Admin Dashboard eCommerce platform (React Vite)
- Built an async bridge system synchronizing third-party stakeholder data pipelines — eliminated data inconsistency across platforms
- Mentored 2-3 intern developers and resolved critical infrastructure blockers for the Solelands project

Back End Developer (Contract), IFG Life – Jakarta, Indonesia Aug 2022 – Jan 2023

Skills: Java, Quarkus, Git, Maven, PostgreSQL, Postman, Microservices

- Architected and shipped 2 microservices from greenfield — delivered 40+ RESTful APIs for Life App (Java Quarkus, ORM JPA)
- Owned 3 core services and optimized microservice architecture — drove 20% system performance uplift
- Modeled UML database architecture for initial core services — cut downstream development time by 15%
- Established code review processes and documentation standards — drove 85% reduction in post-release bug reports
- Optimized database queries — reduced API response times by 30%

Web Developer (Internship), DROP – Jakarta, Indonesia May 2022 – July 2022

Skills: Codeigniter, PostgreSQL, RestAPI

- Delivered backend for the D-Laundry revamp project
- Engineered 20+ RESTful API endpoints (CodeIgniter 4, PostgreSQL, JWT, Postman) for D-Laundry
- Authored comprehensive Postman API documentation — completed all monolithic service requirements ahead of schedule

Education

Universitas Brawijaya, BE in Computer Engineering – Malang, East Java Aug 2018 – July 2022

- Published research on autonomous mobile robot navigation using Hector SLAM and Navfn algorithms (see Publications)

Publications

Prototype of an Autonomous Mobile Robot with a Hoverboard and RPLIDAR Sensor Using Hector SLAM and Navfn Algorithms Jan 2022
