SUMMARY

Dedicated DevOps Engineer & Cloud Operations specialist with over 3 years of experience in Software Development and Cloud Infrastructure at Samsung R&D Institute Indonesia (SRIN). Proven track record in AWS Cloud for cost optimization, security enhancements, and developing efficient CI/CD pipelines. Seeking to leverage expertise in Cloud Operations and DevSecOps to contribute to innovative projects as a future DevOps Architect.

EXPERIENCE

DevOps Engineer & Cloud Operations, Samsung R&D Institute Indonesia – Jakarta, Mar 2023 – present
Indonesia

Skills: AWS (EC2, ECS, EKS, CloudFront, S3, RDS, Lambda, CloudFormation, CodeBuild), DevOps, Linux, Docker, Kubernetes, CI/CD, Samsung Security, Go

- Maintain and optimize AWS cloud infrastructure for 6 main SRIN projects across all environments, achieving 99.9% uptime and reducing operational costs by 15%
- Contributed to global Samsung projects including SmartThings and Content Portal Admin, participating in deployments and hotfixes with 100% success rate
- Implemented canary and blue/green deployment strategies for SmartThings using ECS and ALB, reducing application downtime to near-zero
- Enhanced security posture by resolving 250+ fail points, improving overall security score by 40% in Samsung Security portal
- Designed and implemented AWS security group configurations for 3 projects, adhering to Samsung best practices and improving overall security posture by 35%
- Architected top-tier infrastructure for 2 projects, optimizing performance and scalability
- Developed and maintained daily AWS Cloud, VM, and DB security checklists, ensuring 100% compliance with Samsung Security Standards
- Passed Samsung Advanced Programming (AADC) Certification using C++, demonstrating proficiency in complex programming concepts
- Conducted bi-weekly knowledge sharing sessions on AWS best practices and DevSecOps principles, improving team efficiency by 25%
- Managed critical SRIN projects including Salaam App, S-Lime App, and E-Smart, ensuring 99.99% service availability

Full Stack Engineer, Wolftagon – Indonesia Feb 2023 – present

Skills: Golang, React (Typescript), CI/CD, AWS, Lead and mentorship

- Served as Developer Lead for the Kolektibles App project using Golang and React Vite
- Architected and setup AWS cloud infrastructure and GitHub Actions CI/CD pipelines for Kolektibles
- Developed Kolektibles API using Golang and Admin Dashboard/Web App eCommerce features using React Vite
- Built a bridge system for asynchronous third-party stakeholder synchronization
- Mentored internship developers and solved infrastructure problems for the Solelands project

Back End Developer, IFG Life – Jakarta, Indonesia Aug 2022 – Jan 2023

Skills: Java, Quarkus, Git, Maven, PostgreSQL, Postman, Microservices

- Developed 2 microservices from scratch and created 40+ RESTful APIs for Life App using Java Quarkus and ORM JPA
- Managed 3 core services, improving overall system performance by 20% through microservice architecture optimization
- Designed UML database diagrams for initial core services, reducing development time by 15%
- Implemented code review processes and documentation standards, reducing post-release bug reports by 85%
- Optimized database queries, resulting in a 30% reduction in API response times

Web Developer, DROP – Jakarta, Indonesia

May 2022 – July 2022

Skills: Codeigniter, Postgresql, RestAPI

- Contributed to the D-Laundry revamp project as a Backend Developer
- Created over 20 RESTful API requests using CodeIgniter 4, PostgreSQL, JWT, and Postman
- Developed API documentation using Postman and completed monolithic service requirements during the internship bootcamp

EDUCATION

University of Brawijaya, BE in Computer Engineering – Malang, West Java

Aug 2018 – July 2022

- Design and Photography Community, Student Executive
- Developed Omni-wheel robot obstacle avoidance using ultrasonic sensor
- The committee of RAJA Brawijaya for two years in a row in 2019 and 2020 as a Graphic Designer and Frontend Developer

PUBLICATIONS

Prototype of an Autonomous Mobile Robot with a Hoverboard and RPLIDAR Sensor Using Hector SLAM and Navfn Algorithms

Jan 2022
